They should be staked in the ditch as well as they are not like absorbent boom. They are filters to filter soil as the water passes through the wattle.

Gary

You should stake these wattles as they are intended to knock out sediment depending on the amount of flow you receive. Should be staked in the ditch and outside the ditch.

Hey Gary and Brittany,
Today 4/17/19 I just walked the road ways again, the berms have been removed and the wattles in place
Ramsey is going to open back up to the public tonight at 6pm

The berms and pumps have been removed from the corner at Clara/Wilson at Ramsey and again the officer will be removed tonight at 6

We continue to dig at locations as deemed by the CTEH personnel and KMCO

All boxes are still onsite and will be profiled this week to start the removal of boxes.

OMI is onsite almost completed the cleaning of the warehouse are of all materials. All materials for this job have been collected and stored in roll offs also.

Afternoon,

Dodie we discussed earlier today Gary would like to receive daily updates on the progression of the cleanup at the facility. He would really like to be informed of what's going on outside of the facility, as well as the cleanup inside. I was not allowed to go inside, as you know, so what we discuss during the morning meetings is really all I have been able to relay to him. If you could start doing this, it would be greatly appreciated as I will then, more than likely, only make a few short visits next week versus daily ones.

I would also like to be cc'd on these emails/updates please.

Gary, Dodie has been beyond helpful!

Dodie Gober's cell number is 281.300.0235.

Gary Moore's cell number is 214.789.1627.

Thank you both very much,

Brittany L. Boyke
